National Corrections Reporting Program (NCRP): 2011 Data Request

January 2012

Contents

INTRODUCTION

The National Corrections Reporting Program (NCRP) collects offender-level information from state departments of correction and parole on prison admissions, prison releases, parole releases, and prison custody. **Abt Associates** is the NCRP data collection agent for the **Bureau of Justice Statistics**, the federal agency that administers NCRP. BJS has administered NCRP since 1983.

This document is intended for agencies that have been submitting NCRP data since at least 2009 and have existing computer programs that extract data and re-code the data into "NCRP format." Alternative documentation is available for state agencies that are submitting NCRP data for the first time or in a different format. Contact your Abt site liaison for a copy.

There are two important changes to NCRP for 2011.
- **Part C (Parole Exit) records for 2011 are not being requested at this time**. However, if it is more work for you *not* to submit Part C records, feel free to submit them. Part C records are not included in this data request because Abt Associates is undertaking a comprehensive review of how NCRP obtains parole and post-confinement community supervision records. Revised instructions will be included in the 2012 data request, to be issued in January 2013.
- **A new code for reporting race – two or more races – has been added to the Race variable** (see Variable 5).

Frequently Asked Questions (FAQs) about the 2011 data request begin on the next page. The remainder of the document contains five chapters:
- Chapter 1 contains the instructions and file layout of the three requested NCRP data files (Parts A, B, and D).
- Chapter 2 contains information on each of the variables in the NCRP format, including which of the three files the variable applies to, the variable definition, the coding scheme, and additional instructions and examples.
- Chapter 3, 4, and 5 contain, respectively, the county, state, and offense codes in the NCRP format.

FREQUENTLY ASKED QUESTIONS (FAQs)

General FAQs

What is the National Corrections Reporting Program (NCRP)?
- NCRP compiles offender-level data on prison admissions, prison releases, prison custody and parole discharges. The data, provided by state departments of correction and parole, are used to monitor the nation's correctional population and address specific policy questions related to recidivism, prisoner reentry, and trends in demographic characteristics of the incarcerated and paroled populations. The Bureau of Justice Statistics (BJS) has administered the NCRP since 1983.

Who is the Bureau of Justice Statistics (BJS)?
- The Bureau of Justice Statistics (BJS), a component of the Office of Justice Programs in the U.S. Department of Justice, is the United States' primary source for criminal justice statistics. Its mission is to collect, analyze, publish, and disseminate information on crime, criminal offenders, victims of crime, and the operation of justice systems at all levels of government. These data are critical to federal, state, and local policymakers in combating crime and ensuring that justice is both efficient and evenhanded.

What is Abt Associates' role in NCRP?
- Abt Associates was awarded a cooperative agreement in October 2010 by the Bureau of Justice Statistics to direct the NCRP. (Prior to that date, the U.S. Census Bureau was the NCRP data collection agent.) Abt is responsible for collecting, processing and analyzing data submitted by state departments of corrections and parole. Working with BJS, Abt will also implement BJS's vision of an enhanced and expanded NCRP system that provides timely and useful information to the corrections community.

Who is Abt Associates?
- Abt Associates is a global leader in research and program implementation in the fields of social and economic policy, health, and international development. Known for its rigorous approach to solving complex challenges, Abt Associates was ranked as one of the top 20 global research firms in 2011. The employee-owned company has multiple offices in the U.S. and program offices in nearly 40 countries. Abt has 40 years of experience working for the U.S. Department of Justice and criminal justice agencies across the country.

General FAQs on the 2011 Data Request

Compared to the 2010 data request, has anything changed for 2011?
- Part C (Parole Exit) records for 2011 are not being requested at this time. However, if it is more work for you *not* to submit Part C records, feel free to submit them. Part C records are not included in this data request because Abt Associates is undertaking a comprehensive review of how NCRP obtains parole and post-confinement community supervision records. Revised instructions will be included in the 2012 data request, to be issued in January 2013.
- A new code for reporting race – two or more races – has been added to the Race variable for Parts A, B, and D (see Variable 5).

What data are requested?
- For calendar year 2011, states are asked to submit:
  - NCRP Part A (Prison Admission) records
  - NCRP Part B (Prison Release) records
  - NCRP Part D (Prison Custody) records
- Your Abt site liaison will also discuss with you collecting data from previous years that were never submitted.

When is the data submission due?
- The target date for submitting 2011 NCRP data is March 31, 2012, but we understand that agency constraints can preclude meeting that target date. The Abt site liaison will work with each state to set a realistic target date.

How do we submit the data?
- To ensure compliance with FIPS (Federal Information Processing Standard) 140-2 and the Privacy Act, Abt's secure file transfer platform – *which automatically encrypts the data during transit* – should be used to submit NCRP data. The Abt transfer portal is FIPS 140-2 compliant and meets all the requirements of the Federal Information Security Management Act (FISMA) and Privacy Act. If you prefer to submit data via email or physical media (e.g., CD), you must encrypt the data, in compliance with FIPS 140-2. When you are ready to submit data, please contact your Abt NCRP site liaison to obtain a unique username and password for the transfer portal or to make other submission arrangements. Please protect your transfer portal username and password.

What happens after we submit data?
- Abt will verify the contents of the data files and conduct a series of validity checks on the data (including comparing the submitted data to your submissions from prior years). Typically, this will be accomplished within 2-4 weeks of receipt of your data. Your Abt site liaison will then contact you to review our findings and discuss next steps. Having a thorough understanding of what data you submit is necessary in order to construct valid and reliable national NCRP datasets.

How can we be assured that data we submit is secure?
- BJS and Abt are bound by federal law (42 USC 3789g) which provides that, "No officer or employee of the Federal Government, and no recipient of assistance under the provisions of this chapter shall use or reveal any research or statistical information furnished under this chapter by any person and identifiable to any specific private person for any purpose other than the purpose for which it was obtained in accordance with this chapter. Such information and copies thereof shall be immune from legal process, and shall not, without the consent of the person furnishing such information, be admitted as evidence or used for any purpose in any action, suit, or other judicial, legislative, or administrative proceedings." Abt further recognizes that it is bound by the Privacy Act and the Federal Information Security Management Act (FISMA) regarding how NCRP data are received, processed, and released.

How long will it take us to respond to this data request?
- The amount of time depends on the systems and procedures that your agency has established in previous years to respond to NCRP data requests. If you have responded to NCRP data requests

for at least two years, the amount of time required this year should be lower than the time required last year because Part C records are not being requested. For more information on the NCRP reporting burden (OMB No. 1121-0065 Exp. 10/31/2012), see the NCRP's OMB submission.[1] BJS estimates the time needed to develop computer programs to extract data and to prepare a response to be 24 hours, on average, per type of database containing the information needed, for the first year of participation, and 8 hours, per type of database, during the second and subsequent years. Feedback during data processing and review is estimated to take 2 hours. Send comments regarding this burden estimate or any other aspects of the collection of this information, including suggestions for reducing this burden to the Director, Bureau of Justice Statistics, 810 Seventh Street, NW, Washington, DC 20531; and to the Office of Management and Budget, OMB number 1121-0065, Washington, DC 20503.

How do we get additional information?

- For more information contact your Abt site liaison –Tom Rich (tom_rich@abtassoc.com or 617-349-2753), Michael Shively (michael_shively@abtassoc.com or 617-520-3562), or Mica Astion (mica_astion@abtassoc.com or 617-520-2568). You may also contact the BJS Program Manager, Ann Carson (202-616-3496 or elizabeth.carson@ojp.usdoj.gov) or visit www.ncrp.info for more information.

If, at the end of the "shock" period, the court commits the offender to prison to continue serving sentence, do not report him/her again as an admission.
  - Exclude from the court commitment category all revocations of probation, parole or other conditional release with or without a new sentence for a new offense; all transfers unless the inmate has completed all previous sentences and is beginning to serve time on a new sentence; and all returns from escape or unauthorized departures.
- For Code 20 (Returned from Appeal or Bond):
  - Do not create a new admission record upon an inmate's return if the inmate's sentence time continued to run while he/she was on appeal bond.
- For Code 30 (Transfer):
  - Include inmates admitted from a long term stay in a hospital, mental health facility or another state or federal prison.
  - Do not provide records for movements from prison to prison within your state.
  - Do not report the return of an inmate sent temporarily to another state to stand trial.
  - Do not include inmates who have completed a sentence in another state and are transferred to your state to begin serving a different sentence. Code them as court commitments, parole revocations or other, as appropriate.
- Codes 46, 47, and 48 (Parole Revocation) are limited to those cases where revocation proceedings have been completed.
- Codes 56, 57, and 59 (Mandatory Parole Release) also are only applicable to those cases where revocation proceedings have been completed.

yet. This admission is not a court commitment. Use code 70 or 80 to report admission type for this inmate.

- o A person is sentenced in 2001 to serve three years for burglary. He/she is conditionally released after one year and completes his/her time on parole. He/she is now being incarcerated for a burglary for which he/she has never served a sentence. The correct code is 10, "court commitment."

Nevada would report this inmate's admission as code 30, "Transfer."
    - o An inmate serving a prison sentence in Rhode Island is temporarily released to Vermont to stand trial for charges in that state. The inmate is found guilty and returned one week later to Rhode Island to continue serving his/her time. No admission or release record is created by either state.

- If the inmate received the same maximum sentence length for two different offenses, provide the one your state would designate as the "controlling," "driving," or "most serious" offense.
- If an inmate has four or more offenses and two or more were the same and therefore combined in Variable 13, the sentence length of the combined offenses should be considered separately for Variable 14a.
- Do not combine the sentences of the identical offenses that were combined in Variable 13 to determine the offense with the longest maximum sentence regardless of whether the sentences were consecutive or concurrent.
- If your state offense codes exceed the 6 digits provided, please call the NCRP staff for instruction prior to submitting your data

Examples
- If an inmate has the following offenses:

Simple Assault	5 year sentence	01 count
Burglary 1st degree	4 year sentence	01 count
Burglary 1st degree	3 year sentence	01 count
Grand Theft	11 month sentence	01 count

    Report for Variable 13:

Offense 1	Simple Assault	01 count
Offense 2	Burglary 1st degree	02 count
Offense 3	Grand Theft	01 count

Report for Variable 14a:
Simple Assault (01 count, 5 years)

VARIABLE 14b - PROVIDE THE MAXIMUM SENTENCE FOR THAT OFFENSE

Applies To
- Prison Admissions (Part A)
- Prison Releases (Part B)
- Prison Custody (Part D)

Definition
- The maximum sentence as stated by the court, that the offender is required to serve for the offense listed in Variable 14a.

Character Position
- 121-125

Codes / Coding Information
- Enter the number of years (field 121-123) and months (field 124-125) indicating the maximum sentence length for the offense coded in Variable 14a, or as appropriate, use one of the codes:
  - Zero-fill any year or month position that is not applicable; e.g., 6 years, 0 months is coded "00600"; 2 months and 0 years is coded "00002".
- (99996)   Maximum sentence is Life.
- (99997)   Maximum sentence is Death.
- (99994)   Maximum sentence is Life plus additional years.
- (99993)   Maximum sentence is Life without parole.
- (99999)   Maximum sentence is not known.
- (00101)   One year and one day sentences

Additional Information
- This is the maximum sentence imposed by the court for one specific offense and should not reflect any statutory or administrative sentence reductions.
- If the inmate has more than one sentence for the same type of offense, such as 2 years for one burglary (or one count of burglary) and 3 years for another burglary (on another count of burglary), the 3-year sentence would be reported for Variable 14b. Even if "burglary" was entered only once in Variable 13 (because there were four or more offenses), the sentence length of the identical offense should <u>not</u> be combined for Variable 14b.
- If the offense reported in Variable 14a is one for which the inmate was previously placed on parole or probation, provide the original maximum sentence not the part of the sentence remaining to be served.
- Please document any other code for life or death sentences that may appear on your file.

Examples

- A man enters prison to begin serving time for three sentences. He received 5 years for burglary, 3 years for auto theft, and 1 year for a minor drug violation. The sentences are to be served consecutively and results in a TOTAL maximum sentence of 9 years. However, for Variable 14a and 14b, you need to indicate the <u>one</u> specific offense with the longest sentence. The correct response for Variable 14a is your state code for burglary, and for Variable 14b, "00500" (5 years).
- A man enters prison to begin serving time for two sentences. He received 5 years for burglary and 5 years for drug trafficking, both sentences to be served concurrently. In your state, burglary is considered more serious and to be the "controlling" offense. Therefore, for Variable 14a, you would provide your state code for burglary, and enter "00500" (5 years) for Variable 14b.
- A woman enters prison to begin serving time for three counts of burglary. She received 6 years for the first count, 6 years for the second, and 4 years for the third, all to be served consecutively. Variable 14a would be your state code for burglary and Variable 14b would be "00600." Each count is to be considered separately when it carries its own sentence length.

- Do not subtract time credits.
- Do not subtract prior jail or prison time.
- If all or a portion of a maximum sentence has been conditionally suspended (that is, the sentenced person may in the future be required to serve the suspended sentence or only a portion under certain circumstances), enter as the "Maximum Sentence" the sum of the unsuspended and suspended portions of the maximum sentence of each offense for which the inmate is currently in prison.
- Do not report unconditionally suspended sentences.

(88888)   Court did not impose a sentence to community supervision.
(99999)   Sentence to community supervision is not known.

Additional Information
- This variable is applicable only if the court imposed a sentence to community supervision that is separate from the sentence to prison.
- The sentence to post-incarceration community supervision may be in the form of parole, probation, or other supervision in the community, as ordered by the court.
- This variable should be reported only if a sentence to community supervision was imposed BY THE COURT. If the court did not impose a sentence to community supervision, this variable should be reported as "not applicable".

Examples
- The offender is sentenced by the court to serve a 5-year fixed prison term and an additional 2-year term on community supervision after release from prison. The correct entry is "00200".
- The offender is sentenced by the court to serve a 2 to 10-year sentence in prison. The court did not sentence the offender to a separate term of community supervision. The term of community supervision will be determined by an administrative agency, such as a parole board, when the offender is approved for release from prison. The correct entry for this variable is code "88888".

VARIABLE 33 – PAROLE HEARING/ELIGIBILITY DATE

Applies To
- Prison Admissions (Part A)
- Prison Custody (Part D)

Definition
- The date the offender is eligible for review by an administrative agency such as a parole board, to determine whether he or she will be released from prison.

(99999993)	Offender is expected to serve life without parole.
(99999997)	Offender is sentenced to death.
(99999999)	Parole eligibility date is not known.

Additional Information
- This variable is applicable only if the decision to release an offender is controlled by an administrative agency such as a parole board.
- The parole hearing eligibility date should be calculated from the total maximum sentence (variable 15) for all offenses. For the year-end custody record, report the next date the inmate will be eligible for a parole hearing.

Examples

- An offender was admitted to prison on January 1, 1999, with a 15 years to life sentence for second degree murder. The law states the offender is eligible for parole board release after serving 85% of the minimum 15-year sentence (or 12 years 9 months). The parole eligibility date is calculated by adding 12 years 9 months to the date of admission. The offender will be eligible for parole board release on October 1, 2011. The correct entry for Variable 33 is "10012011".

- A judge sentences an offender to serve 2 to 4 years in prison for theft. The offender is eligible for parole board release after the minimum 2-year sentence has been served. The offender was admitted to prison on January 1, 1999, with 6 months in jail time credits. The parole eligibility date is calculated by adding two years to the date of admission, and subtracting six months for credited jail time. The parole eligibility date is July 1, 2000. The correct entry for Variable 33 is "07012000".

- An offender is admitted to prison on January 1, 1999, with a 5 to 10-year prison sentence for fraud. The offender is allowed to earn a maximum of 45 days good time for every 30 days served. The law states non-violent offenders are eligible for parole board release when their good time plus actual time served equals 1/4 of the minimum sentence. The offender's good time plus actual time served will equal 1/4 of the minimum sentence (15 months) when the offender has served 6 months in prison. After serving 6 months the offender may have earned a maximum of 9 months good time credit. The parole eligibility date is calculated at 6 months from the date of admission, or July 1, 1999. The correct entry for Variable 33 is "07011999".

- An offender is admitted to prison on January 1, 1999, with a 10-year sentence for aggravated robbery. The law requires violent offenders to serve 50% of the sentence before they are eligible for parole board release. Good time credits may be accrued only after 50% of the sentence has been served. The parole eligibility date is 5 years from the date of admission, or January 1, 2004. The correct entry for Variable 33 is "01012004".

- While on parole, an offender is arrested for aggravated assault and is sentenced to a 10-year prison term for the new offense. At sentencing, the offender's parole is revoked with 2 years remaining on a previous robbery sentence. The offender is admitted to prison on January 1, 1999 as a parole violator, with a 12-year total maximum sentence for both convictions. Good time credits may be accrued only after 50% of the sentence has been served. The parole eligibility date is 6 years from the date of admission, or January 1, 2005. The correct entry for Variable 33 is "01012005".

VARIABLE 34 – PROJECTED RELEASE DATE

Applies To
- Prison Admissions (Part A)
- Prison Custody (Part D)

Definition
- The projected date on which the offender will be released from prison.

Character Position
- 224-231

Codes / Coding Information

- Code the month (positions 224-225), day (positions 226-227) and year (positions 228-231) indicating the projected release date, or as appropriate use one of the following codes:

(88888888)   Decision to release an offender is determined by a parole board.

(99999993)   Offender is expected to serve life without parole.

(99999997)   Offender is sentenced to death.

(99999999)   Projected release date is not known.

Additional Information

- Statutory requirements, good time credits, jail time credit, and any other factors which might modify the prison release date should be included in this calculation.
- If an offender is serving time for more than one offense, the projected release date should be calculated from the total maximum sentence (variable 15) for all offenses.

Codes / Coding Information

- An offender enters prison on January 1, 1999, with a 10-year sentence for armed robbery. At sentencing, the offender received 6 months credit for time served in jail prior to being admitted to prison. While in prison, the State allows inmate to earn one day work credit for every 3 days served, not to exceed 15% of the sentence. The projected release date is calculated by subtracting the 6 months jail credit and the 1 ½ years of available work credit from the 10-year prison sentence. The offender's projected release date is 8 years from the date of admission or January 1, 2007. The correct entry for Variable 34 is "01012007".
- A judge sentences an offender to serve 10 years in prison for armed robbery. The offender is admitted to prison on January 1, 1999, and is required by State law to serve 6/7 of the 10-year sentence (8.57 years, or 8 years 6 months and 26 days). The offender's projected release date is 8 years 6 months and 26 days from the date of admission or July 26, 2007. The correct entry for Variable 34 is "07262007".
- A judge sentences an offender to serve 2 to 6 years in prison for theft. The offender is admitted to prison on January 1, 1999, and is given 3 years of good time credit (one-half the maximum sentence). Assuming the offender does not lose any good time while incarcerated, he or she is projected to be released after serving the remaining 3 years of the maximum sentence. The projected release date is calculated as January 1, 2002. The correct entry for Variable 34 is "01012002".
- A judge sentences an offender to serve 5 to 10 years in prison for aggravated robbery. The offender is admitted to prison on January 1, 1999, and given 5 years of good time credit (one-half the maximum sentence). After serving 8 years the offender has lost all good time credits due to disciplinary actions. The offender is expected to expire the sentence, or serve the entire 10-year maximum sentence, and release unconditionally from prison. The projected release date is 10 years from the date of admission or January 1, 2009. The correct entry for Variable 34 is "01012009".
- While on parole, an offender is arrested and convicted for armed robbery and sentenced to a 10-year prison term for the new offense. The offender's parole is revoked with 2 years remaining on a pervious robbery sentence. The offender is admitted to prison on January 1, 1999 as a parole violator, with a 12-year total maximum sentence for both robbery convictions. The offender is given 6 years of good time credit at admission (one-half the total maximum sentence). The

projected release date is 6 years from the date of admission, or January 1, 2005. The correct entry for Variable 34 is "01012005".

VARIABLE 35 – MANDATORY RELEASE DATE

Applies To
- Prison Admissions (Part A)
- Prison Custody (Part D)

Definition
- The date the offender by law must be conditionally released from prison.

Character Position
- 232-239

Codes / Coding Information
- Code the month (positions 232-233), day (positions 234-235) and year (positions 236-239) indicating the mandatory release date, or as appropriate use one of the following codes:

(88888888) Offender does not have a mandatory release date.
(99999993) Offender is expected to serve life without parole.
(99999997) Offender is sentenced to death.
(99999999) Parole eligibility date is not known.

Additional Information
- This date should reflect jail time credits and any statutory or administrative sentence reductions, including good time.
- The mandatory release date should be calculated from the total maximum sentence (variable 15) for all offenses.
- This variable is intended to capture mandatory conditional release policies structured around good time and other administrative sentence reductions.
- Do not enter the date the offender will expire the sentence (serve the entire sentence and be released unconditionally from prison).

Examples
- An offender is admitted to prison on January 1, 1999, with a 5 to 10-year prison sentence for fraud. The law requires mandatory release for non-violent offenders when good time credits plus actual time served in prison equals the maximum sentence. The offender is allowed to earn a maximum of 45 days good time credit for every 30 days served. The mandatory release date is calculated by determining the date the offender's actual time served plus good time will equal the maximum sentence. After serving 4 years, the offender will have earned a maximum of 6 years in good time credit. The mandatory release date is 4 years from the date of admission, or January 1, 2003. The correct entry for Variable 35 is "01012003".
